

HP Landscaping

Chemical Handling SOP

CONFIDENTIAL - FOR EMPLOYEE USE ONLY

Last Updated: April 2026

Chemical Safety Overview

HP Landscaping uses various chemicals including fertilizers, herbicides, pesticides, and fungicides. Proper handling is essential for employee safety and environmental protection.

ALL chemical applicators must hold a valid state pesticide applicator license.

Safety Data Sheets (SDS) for all chemicals are maintained in the truck-mounted binder and digitally in the employee portal.

PPE for Chemical Handling

When mixing or applying chemicals, the following PPE is required:

- Chemical-resistant gloves (nitrile or neoprene)
- Safety goggles or face shield
- Long-sleeved shirt and long pants
- Chemical-resistant boots
- Respirator (when specified on SDS)

Spill Response

In the event of a chemical spill:

1. Evacuate the immediate area
2. Don appropriate PPE
3. Contain the spill with absorbent materials from the spill kit
4. Do NOT wash chemicals into storm drains or waterways
5. Notify your supervisor and complete a spill report
6. Contact environmental compliance if spill exceeds 1 gallon
