Equipment Operation Guide

CONFIDENTIAL - FOR EMPLOYEE USE ONLY

Last Updated: April 2026

Pre-Operation Inspection

Before operating any equipment, perform the following checks:

1. Inspect for visible damage, loose parts, or leaks
2. Check fluid levels (oil, fuel, hydraulic fluid)
3. Test all safety switches and guards
4. Verify blades/cutting mechanisms are sharp and secure
5. Ensure emergency shut-off is functional

Mower Operation

Commercial Riding Mowers: Only employees with current certification may operate riding mowers.

- Always mow across slopes, never up and down
- Keep all guards and shields in place during operation
- Never carry passengers on riding equipment
- Disengage blades before crossing walkways or driveways
- Shut off engine before performing any maintenance

Trimmer & Blower Safety

String Trimmers: Wear face shield and hearing protection. Maintain firm two-hand grip. Watch for debris projection.

Backpack Blowers: Never point exhaust at people. Be aware of dust and debris direction. Use hearing protection rated for 85+ dB.
